*The budget for the development of **KIDDO** is based on a total length estimation of 1 year. This will include all the production phases, testing, marketing and promotion.

We received economical support during 2020 from the Stimulering Funds Netherlands (Digital Culture), this allowed us to finish a demo and start building a small community.
We realized the potential of **KIDDO** so we decided to apply to Indie Funds to make the project more full fledged and reach a wider audience.
